DETAILED ACTION

Election/Restrictions

Claim 3 is withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected specie, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 7.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-2 and 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, in lines 1-2, applicant should clarify what is meant by "a pair of 'opening positions'." In lines 4-5, applicant should clarify the specific position intended by "as seen from a vehicle occupant side." In lines 9-10, applicant should clarify the intended symmetry determined by **the** predetermined base line intersecting each of the 'opening positions'."

Regarding claim 2, applicant should clarify the structure intended by "one of the steering wheel disc constituting parts."

Regarding claim 4, applicant should clarify the symmetry intended by the "predetermined base line passes through a center of the steering wheel."

Art Unit: 2832

Regarding claim 5, in line 2, applicant should clarify what is meant by "opening positions' are formed." In line 4, applicant should clarify the specific position intended by "as seen from a vehicle occupant side."

Regarding claim 6, in line 3, applicant should clarify what is intended by "a first opening portion." In line 5, applicant should clarify the specific position intended by "as seen from the vehicle occupant." In line 9, applicant should clarify what is intended by "the second opening portion."

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2 and 4-6, as best understood in view of the rejections under 35 U.S.C. 112, second paragraph, are rejected under 35 U.S.C. 102(e) as being anticipated by Leng [US 6,525,283].

Leng discloses a switch structure of a steering wheel [1] at which open portions [2] are formed between an inner periphery of a rim [7] of the steering wheel and an outer periphery of a pad cover [5] of the steering wheel wherein at each of the open portions a switch assembly [figure 4] constituted by a plurality of switches [9, 10] are disposed arranged such that the switching assemblies are symmetrical and can be mounted in either of the open portions [column 2, lines 45-55].

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
